Reference sound quality

With their ONYX speakers Eton succeeds in making a statement for the love of good sound. No effort was spared to provide the ONYX Series with best prerequisites to play into the hearts of sound lovers all around the world. Conscientious engineering and the finest materials, hand-crafted in Germany, result in a speaker series that does not need to shy away

from comparison. Where Eton consciously deploys traditional materials, such as hand-coated fabric for dome tweeters or folded paper cones for midrange units and woofers. Thus, the ONYX 28 tweeter, the ONYX 80 midrange and the ONYX 16 mid/woofer provided best test results by their detailed, unobtrusive sound.
