PLUG & PLAY COAXIAL SYSTEM FOR VW, SEAT, ŠKODA

The 2-way plug & play coaxial system EM-VWRX155 (15.5 cm/6") is the perfect addition to an EMPHASER sound system, especially in the rear area of various Volkswagen, Cupra, Seat, or Škoda vehicle models.

Thanks to the CRYSTALGRAIN compound diaphragm, the midbass drivers of the coaxial system deliver highly detailed and natural sound. The increased stiffness, low resonance, improved damping properties, and wide frequency response result in precise and detailed sound reproduction.

The diaphragm thickness is designed to provide stability for powerful bass attacks while maintaining the necessary lightness for precise midrange frequencies.

The speaker basket, designed in EMPHASER style, impresses with its high stability and perfect fit. The speaker connects via the vehicle's original plug.

The 20 mm fabric dome tweeter offers numerous advantages, including low distortion, even dispersion, and a natural, warm sound. These characteristics ensure that music can be experienced in all its clarity and brilliance.

KEY FEATURES

- 15.5 cm/6" plug & play 2-way coaxial speaker system for VAG vehicles
- CRYSTALGRAIN midbass diaphragm for outstanding sound performance
- Durable rubber surround
- High-performance ferrite magnet
- 25 mm aluminum voice coil former
- Tweeter with 20 mm fabric dome
- Vehicle-specific plug & play connection
- Includes rivets for installation
- Scope of delivery: 2 x speaker, 2 x adapter for Seat and Škoda models, 8 x rivet for installation

TECHNICAL DATA

EM-VWRX155

Nominal power handling	80 W RMS
Nominal impedance	2 ohms
Frequency response	70 Hz – 22 kHz
Sensitivity 1 W/1 m	90 dB

CRYSTALGRAIN compound diaphragm

Large, powerful ferrite magnet

Tweeter grille with high sound transmission

Vehicle-specific terminal
