ETON MW 8 FLAT – FLAT 8" SUBWOOFER FOR POWERFUL BASS

Attention bass lovers! ETON is expanding its MW FLAT subwoofer series with another model – the 8"/20 cm bass driver MW 8 FLAT.

Just like the 10" and 12" models, the new long-throw flat subwoofer guarantees ultra-rich, powerful, and dynamic bass.

The MW 8 FLAT features a powerful internal ferrite magnet and a specially designed, extremely flat die-cast aluminum basket. With minimum dimensions of just 74.5 mm installation depth, the MW 8 FLAT is a real problem solver: thanks to its design, it can be flexibly installed in any type of enclosure, where it delivers powerful, dynamic bass.

The MW 8 FLAT is characterized by high manufacturing quality, elaborate design, and the use of classic, heavy-duty materials. For example, it uses a pressed paper-foam-paper sandwich cone, which is extremely rigid and does not falter even at high levels and during bass orgies.

The extremely torsion-resistant basket ensures the necessary precision. A heavy-duty, large dual voice coil in 2 x 2 ohms delivers the power cleanly to the ear.

ETON MW FLAT – the flat SQL subwoofer series, engineered in Germany.

KEY FEATURES MW 8 FLAT SUBWOOFER

- Specially designed, extremely torsion-resistant, powder-coated die-cast aluminum basket for low installation depth
- Pressed paper-foam-paper sandwich cone
- Long-throw rubber surround
- Flat, powerful ferrite magnet with large pole core bore for maximum performance
- Heavy-duty dual voice coil (2 x 2 ohms)
- Pre-installed, soldered connection cables with strain relief
- Engineered in Germany
- Scope of delivery: 1 pc. MW 8 FLAT subwoofer

TECHNICAL DATA	MW 8 FLAT (20 cm/8")
Nominal / Music power	2 x 200 W RMS / 2 x 250 W
Impedance	2 x 2 ohms
Sound pressure level	81.5 dB
Voice coil diameter	51 mm
Outer diameter	217 mm
Cut-out Durchmesser	186 mm
Mounting depth	74,5 mm
